Decontamination

Dental Chairs

Digital Imaging

Compressors

Cabinetry

Lights

Suction

Handpieces

# Service Contracts

DB Dental fully understands the necessity to provide a complete range of Engineering Services to cover all aspects of maintenance, service and repair for typical equipment throughout the practice.

In addition DB also understands the importance of minimising surgery downtime and therefore provides a comprehensive range of support including Flexible Service Contracts in order to keep your practice running efficiently, reliably and effectively.

DB Dental offer a range of Service Contract options which means our contracts can be tailored to suit your individual needs in accordance with the equipment you have and type of cover you prefer.

Our service starts with a 'Free of Charge' visit to your practice to audit and assess the equipment, noting the type, manufacturer and condition so we can accurately quote for a contract tailored to your requirements.

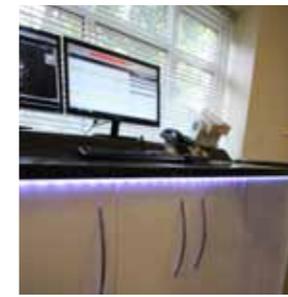

“ The service provided has been excellent, with a 'speedy' & professional approach provided by DB Dental's admin staff and their engineers. I can fully endorse this company and all its staff. **Colin Allen, Lincolnshire NHS.** ”

A DB Dental contract can cover all, or part of your Treatment Centres, Suction systems, Compressors, X-Ray, Autoclave Service & validation, Pressure Vessel Inspection etc.

Other benefits are different options to pay, inclusive reactive breakdown calls and a range of loan units to keep your surgery up and running in the event of a major failure until your existing equipment is repaired or replaced.

All our maintenance, testing and validation services are carried out by accredited engineers to full HTM and manufacturer guidelines

# Bespoke Cabinetry

We can provide bespoke cabinetry design solutions to maximise the full potential and ergonomics for any dental surgery. Our technical team are able to take you through a comprehensive range of design options, textures and colours and advise you on the layout of your surgery whilst ensuring that full attention is paid to every detail.

All cabinets are custom made and produced to the highest standard of workmanship; this gives DB Dental the flexibility to provide you with a unique design to meet your exact wishes.

To ensure a seamless installation is carried out our design department will visit your facility take the necessary details and measurements to best utilise the available space.

Our cabinets are available in a broad range of colours for worktops and fronts, soft-close doors and drawers, all with smooth, good quality Parapan and laminates for effective and easy cleaning.

In addition DB Dental Equipment can also provide extremely tough and non-porous CORIAN solid surface worktops and bowls which are bonded together with virtually invisible seams to improve surgery hygiene and appearance.

To discuss your cabinetry requirements contact us on 01484 401015

# Thackeray Dental Care

Client: Simon Thackeray  
Location: Mansfield

Gareth met Simon Thackeray at the BDA three years ago where Simon was representing Practice Plan. After a friendly chat Gareth arranged a site visit to get a feel for what Simon envisaged. Simon was keen to create a wow factor in his practice with clean lines, contemporary curves and a minimal, but modern feel with state of the art equipment.

The project was complex in terms of scheduling the installation so that the practice could continue to run as normally as possible, whilst the works were carried out. Extending next door allowed us to create the new surgeries and reception area whilst Simon continued to treat patients in the existing side. Using this phased approach allowed us to then move patients to the new surgeries, whilst we converted the waiting room in the original side of the building to an additional surgery.

“Nothing was too much trouble for Gareth at the design stage, and the liaison with A-dec especially, was extremely close, resulting in the absolute personal design of the surgeries to my exact specification. I have already recommended DB Dental to other practices who would benefit from the expertise they have.” From 15 year old equipment to state of the art A-dec Treatment Centre's with bespoke dental cabinetry consisting of Corian solid surface work tops and Parapan fronts.

“ It has felt that I have been assisted by a team of friends who shared the common goal of making my practice what I envisioned. **Simon Thackeray** ”

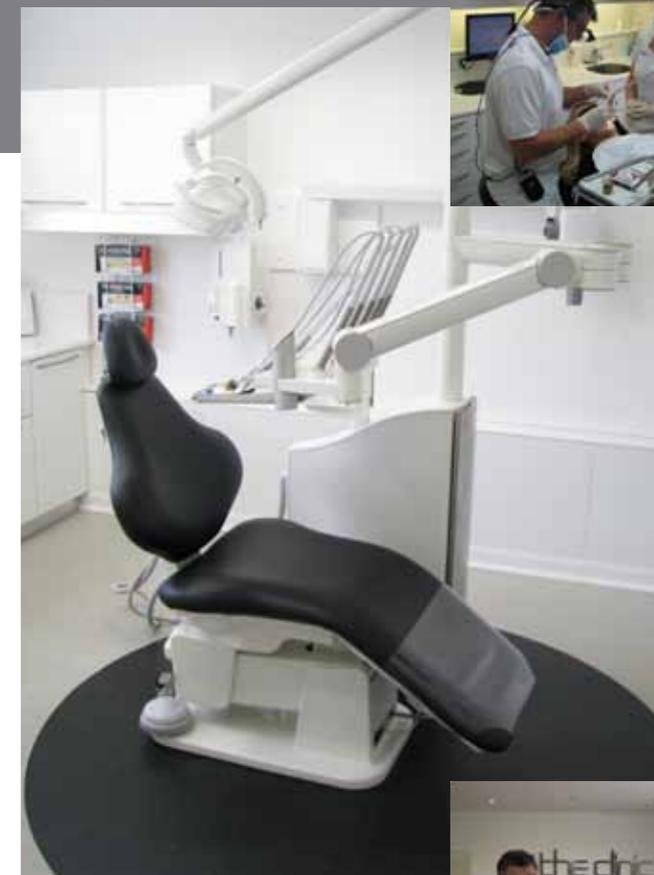

# The Clinic Dental Facial Haywards Heath

There was only one decision to be made when Sven Sorensson and Mads Nyborg decided to re-equip their dental practice in Haywards Heath – UNIC or UNICLINE but either way it had to be Heka Dental.

Heka equipment has been designed to create an ergonomic, comfortable and aesthetically pleasing environment for both patient and practitioner. If like Sven and Mad's you specialise in offering implants, comfort for dentist and patient becomes particularly important since this type of treatment often lasts hours rather than minutes.

As Sven said, “Dentists sit and work at their Treatment Centres for many hours a week, so they need to get it right. Therefore it is worth taking your time before making an investment to make sure it is going to be right for you. If you choose Heka Dental you will have made the right decision whichever specification, UnicLine or UNIC, suits your Practice best”.

“ Our Heka Dental equipment has always lived up to all of our expectations. **Sven Sorensson, The Clinic Dental Facial.** ”
